

This is Us

The past is a roadmap to a future
Scars tell stories and there's always healing in these cuts
When you need someone to listen
Because validation always leads to trust
We are by your side and
All the doors are open here tonight
So come on in and feel what it's like to be the you you always wanted to be
This is us and this is love
Together in community we're free

You have value to the world
You deserve a chance to thrive
The world is better with you here
You deserve the chance to feel alive
We'll walk that path together
Side by side we will survive
Side by side we will survive
Monadnock Peer Support
Our doors our open wide

When the road you've been walking becomes a dead end
And the street lights have all been burned out
When the ghosts that you are chasing keep you up night pacing
Trapped in the noise and the doubt
When the doors are all closed and the windows are broken
And the whispers have all turned to shouts
There's a place you can go where everyone knows
That the seeds need sunshine to sprout

The doors are open here tonight
So come on in and feel what it's like
To be the you you always wanted to be
To be the you you always wanted to be
Be the you you always wanted to be
